Mate Kovasznai

Data Scientist
Breda, 184 4837BE, Netherlands | mate.kovasznai@gmail.com | +36706142927 | LinkedIn
Personal Details:
Hungarian | 2004.05.07 | Budapest

I am a Data Science and Artificial Intelligence student, skilled in developing predictive models, analyzing datasets, and creating data-driven solutions using tools such as Pandas, Scikit-learn, and Power BI. Eager to apply analytical and problem solving skills and contribute to real-world AI projects.

Professional Summary

AI Engineer and Data Science student with an Associate AI Engineer for Data Scientists certification by Datacamp and hands-on experience with developing and deploying NLP models in both on-premises and Microsoft Azure cloud environments. Skilled in building REST APIs, integrating web APIs for large-scale data collection, and delivering end-to-end AI applications with a focus on scalable, production-ready solutions.

Areas of Expertise

- Python
- Natural Language Processing
- Git
- SQL
- Pandas
- Github
- scikit-learn
- WEB API's
- Numpy
- Transformers
- MLOPS
- Power BI

Accomplishments

- Certificate of Associate AI Engineer for Data Scientists by DataCamp
- School challenge Silver medal - Best Mean Absolut Error score of Gradient Boosting Regressor model

Professional Experience

Data Analyst, IQB Medical private clinic, Budapest

May 2025 to Dec 2025

During this project I worked together with the clinic’s marketing team, to find ai. solutions to enhance their marketing. We built a power BI dashboard giving them continuous insights about their marketing campaigns and their available appointments.

Data Analyst (School collaboration), DKG Groep, Bergen op Zoom

Jan 2025 to Jan 2025

Collaborated with a Data Scientist from DKG Groep to develop a predictive model based on dishwasher installation data. Applied statistical analysis and data modeling techniques to identify key indicators and failure patterns contributing to unsuccessful on-site dishwasher installations, translating raw operational data into actionable insights for the client.

Data Analyst (School collaboration), IKEA Breda, Breda

Oct 2024 to Oct 2024

Conducted a fraud pattern analysis for IKEA Breda using encoded employee and payment terminal data related to an active fraud investigation. Built an interactive Power BI dashboard to visualize transaction data and support investigative decision-making, identifying specific terminals and time patterns linked to fraudulent activity. The analysis provided actionable leads for the client's internal investigation and resulted in formal recognition from IKEA Breda, including a LinkedIn recommendation for delivering an impact analytical results.

Education

Breda University of Applied Sciences, Breda

HBO, Sept 2024 to Present

The curriculum includes deploying machine learning models in production environments, structure, automation, monitoring, and management of ML systems.

Technical Proficiencies

Data Science and Analytics: Machine Learning, Data Analyzis, Project deployment, Data Processing, Databases

Professional Skills: Problem Solving, Critical Thinking, Analytical Thinking, Adaptability, Decision Making
